SAMPAT Productivity Monitoring

Empower Your Workforce with Data-Driven Insights

Quick Info

SAMPAT's Productivity Monitoring System empowers organizations to track, analyze, and enhance employee performance across hybrid and remote work environments. Gain deep insights into application usage, website visits, task engagement, and behavioral patterns—all from a single, centralized dashboard.

Whether you're managing distributed teams or ensuring focused work in the office, SAMPAT helps maximize output, reduce inefficiencies, and build a culture of accountability and growth

◆ Key Features

User Activity Tracking

Monitor keystrokes, mouse clicks, and application use with consent-based or stealth modes. Track time spent on productive vs. unproductive activities to drive actionable insights.

App & URL Usage Analysis

Get detailed reports on which applications and websites are used, how frequently, and by whom. Identify trends, blockers, and opportunities for streamlining workflows.

Random Screenshot Capture

Capture encrypted, blurred screenshots at scheduled intervals to maintain visibility while respecting privacy. Ideal for audit trails and accountability.

Offline Data Sync

Ensure uninterrupted monitoring even without internet access. Activity data is stored locally and auto-synced when connectivity is restored.

Productivity Classification

Automatically categorize apps and URLs as productive or unproductive. Customize categories to reflect your organization's unique workflow and KPIs.

Daily & Weekly Reports

Receive email summaries on team productivity, top used tools, and individual efficiency levels. Stay informed and make fast, informed decisions.

◆ Benefits at a Glance

● Real-Time User Monitoring

Track team activities in real time—whether remote or in-office—with full visibility into engagement patterns and workload.

● Behavioural & Workforce Analytics

Identify overworked or underutilized employees, detect potential burnout, and balance team workloads efficiently.

● Customizable Productivity Reports

Generate insightful daily, weekly, and monthly reports on individual and team performance to guide managerial decisions.

● Integrated BI Dashboard

View top-used applications, peak work hours, and activity trends via an intuitive, analytics-rich dashboard.

● Stealth Mode Deployment

Deploy silently using tools like Active Directory or Intune for seamless and discreet rollout across the organization.

● Compliance & Security

Secure data with encryption, activity logs, and alerts for suspicious behavior to prevent data leaks and compliance risks.

Why SAMPAT Stands Out

User-Friendly Interface

Navigate with ease through intuitive layouts designed for all levels of users—from HR to IT.

Customizable

Adapt the system to your business needs with configurable productivity thresholds, categories, and schedules.

Scalable Solution

Supports teams of all sizes, scaling effortlessly as your workforce grows or becomes more decentralized.

Comprehensive Support

Access dedicated onboarding, training, and continuous support to ensure maximum ROI.

Secure & Reliable

Utilizes enterprise-grade security protocols for data protection, integrity, and safe remote operations.
